

What happens next? Now our line drawing is going to get very interesting!

Draw a **second line** below where you started to draw from the first side and carefully follow the **inside** of the knot. You can decide if you would like to make this thin or thick, pointed or curved.

Box F shows the original line. Draw under the original line to make a Knox Knot. Try to draw your own Knot in Box H Below and draw another in Box I

Reflect your designs along the thick lines on the grid. Look at the new interlacing patterns!
